

# BOYS & GIRLS CLUB OF DALTON

## AT A GLANCE

The Boys & Girls Club of Dalton has long been a place where kids find mentorship, encouragement, and a sense of belonging. The Club provides after-school programs that go far beyond recreation, instilling life lessons, building confidence, and creating lasting impact. When the existing gym flooring no longer reflected the care and excellence the organization pours into its students, leadership saw a need to upgrade.

## CHALLENGES

- The existing floor was outdated and no longer delivering the look or performance the club needed. It lacked visual appeal and was unsafe.
- As an active youth facility, extended gym closures weren't an option. The club needed a solution that could be installed quickly without disrupting programming.
- The space needed to feel new, bright, and intentional while reflecting the level of care and investment that B&GC offers students.

## SOLUTIONS

VersaCourt's customizable, durable surfaces transformed B&GC's old court system into a safe, branded, and flexible play space designed for creativity, connection, and long-lasting community impact.

### Durability, Performance & Visual Impact

Compete Indoor Tile delivered an immediate "night and day" transformation. Brighter, cleaner, and more professional in appearance. It also provides the durability needed to support daily programming and long-term impact.

### MODULAR BY DESIGN

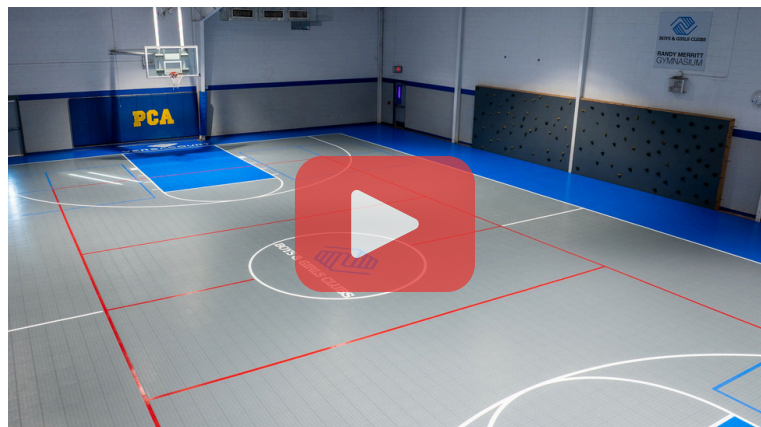

The modular tile system allowed the team to remove and replace the entire surface in just hours, completing the new install before students arrived. Our custom design tool ensured a precise layout and seamless installation.

*"It looks like a puzzle going together... seeing them install it so fast, I think that makes a difference in the product."*

*"The better the resources you have, I feel like the bigger of a difference you can make."*

*"Seeing the impact and the expressions on the kids' faces, you're reminded of why we do this."*
